

Young Researchers Abstracts

As young researchers abstracts we refer to those abstracts that cumulatively meet the following criteria:

- Include the findings / results / parts of research work of graduate or master degree students (diploma, graduate or master degree theses), or PhD students within the framework of their PhD thesis.
- The graduate, master degree or PhD student is the first author.
- The graduate, master degree or PhD student is younger than 35 years at the date of the paper abstract submission.

For each young researcher's paper a short 3-slide presentation of 3 minutes in special sessions will be organized (PechaKucha type), with parallel poster presentation.

Out of the total submitted young researchers' papers, the Hellenic Institute of Transportation Engineers will award the best paper of (a) graduate or master degree student and (b) PhD student (one award per category (a) and (b)), with a prize award of 300 € respectively. The awarded papers will be presented during the Closing Session of the 8th ICTR, whereas favourable mention to the second and third best papers for each category will also take place.
